➔ **Backend Dev :** Node.js , Express.js
➔ **Database :** MongoDB , Mongoose
➔ **Other :** Rest Api , JSON , Web3 , Git & Github

Projects:

➔ **Movie App :** The React JS movie app is a modern and user-friendly web application that provides users with access to a vast library of popular and upcoming movies. The app is built using the React JS framework, which is known for its efficiency, flexibility, and scalability, making it a popular choice among developers. One of the key features of the movie app is the integration of an API, which allows users to browse and search for movies quickly and easily.
